Employment History

Senior Software Engineer

Turing, Remote

February 2025 - Current

- Leading development of micro-frontend architecture to enable modular, scalable applications across teams.
- Building robust, high-performance UIs using React, Next.js, and TypeScript, ensuring adherence to modern development practices.
- Developed and maintained component libraries using Storybook, promoting design consistency and reusability across projects.
- Integrated GraphQL for efficient, scalable API consumption and optimized data-fetching strategies.
- Writing and maintaining unit and integration test cases, ensuring high test coverage and code quality across features.
- Actively collaborating with cross-functional teams to implement best practices in frontend performance, accessibility, and code maintainability.
- Participating in code reviews, mentoring junior developers, and contributing to the overall improvement of development workflows and CI/CD pipelines.

React Lead

Synechron, Bengaluru

July 2024 - February 2025

- As a React Developer, I am currently engaged in developing dynamic and user-friendly web pages for a prominent banking client. My role involves utilizing cutting-edge technologies, including

React, Redux, TypeScript, Jest, and Material-UI (MUI), to deliver scalable and responsive web applications. I focus on creating clean, maintainable code and ensuring optimal performance and user experience. My expertise includes component-based architecture, state management, and unit testing, making me adept at handling complex UI challenges in a fast-paced environment.

Senior Technical Specialist

Coforge, Bengaluru

June 2023 - July 2024

- Developed and maintained React micro-frontend applications within a collaborative team environment. Utilized React, TypeScript, and HTML to build interactive and responsive user interfaces. Implemented styling using CSS and leveraged Storybook components for modular design and development. Deployed applications on Azure, ensuring scalability and reliability of web solutions. Practiced Agile methodologies using Azure Dashboard for project management and sprint tracking. Ensured code quality and reliability by writing regular test cases using Jest for comprehensive test coverage.

Senior Software Engineer

Hexaware Technologies, Bengaluru

July 2022 - May 2023
